[Docket Number FRA-2008-0065]

Petition for Extension of Special Approval

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on July 24, 2021, the Maryland Department of Transportation Maryland Transit Administration MARC Train Service (MACZ) petitioned the Federal Railroad Administration (FRA) to extend a special approval of an alternate standard for periodic brake equipment maintenance, pursuant to 49 CFR 238.309(a)(2). The relevant FRA Docket Number is FRA-2008-0065.

Specifically, MACZ requests to continuing applying alternate standards for the CCB-KE-3.9 air brake system of the MARC HHP-8 locomotive fleet. This alternate standard to 49 CFR 229.29(e) and 238.309(a)(2) is to allow for the level two and level three maintenance intervals to be 2,944 days (8 years). MACZ explains its request is based on the successful history of the special approval, as well as the results of an age exploration study for the HHP-8 air brake system as outlined in Docket Numbers FRA-2008-0065 and FRA-2001-10596. The locomotives are expected to continue in passenger service for MACZ, operated and maintained by Amtrak on the Northeast Corridor, for the foreseeable future.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they

should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:
